Siderails

TO LOWER RAIL: Pull up on handle located under siderail. The rail will gradually lower.

TO RAISE RAIL: Pull the siderail upward to its highest position until it locks in place.
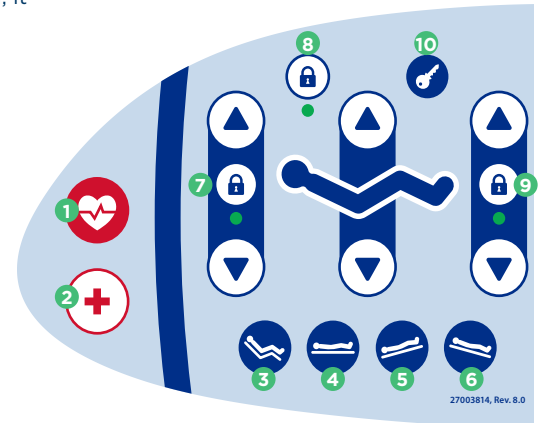

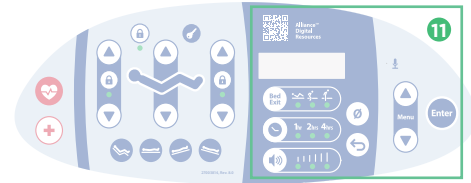

Battery Backup

This bed is equipped with an emergency battery backup. The battery will charge when plugged into an AC outlet.

Footboard Controls

To Lock/Unlock specific features:

Press the key button and then press the lock button associated with that feature. Repeating this process will then unlock the feature. While this can only be performed from the footboard control, it affects ALL controls.

1. CPR
2. Nurse Call
3. Cardiac Chair
4. Bed Flat
5. Trend
6. Reverse Trend
7. Head Up/Down Lock
8. Bed Up/Down Lock
9. Foot Up/Down Lock
10. All Functions Lock
11. RSS Controls (see reverse)

Hand Control

1. Bed Flat
2. Cardiac Chair
3. Head Up/Down
4. Feet Up/Down
5. Bed Up/Down
6. Under-Bed Lighting
7. Nurse Call
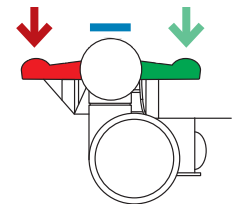

Siderail Controls

Casters

Green

Stepping on the green pedal locks the right foot caster parallel with frame.

Neutral

Casters are unbraked.

Red

Brakes can be manually applied by stepping down on the red pedal.

Code Situation

1. Unlock casters and pull bed from wall.

2. Engage brakes, remove headboard, and lower siderails for patient access.

3. For air support surfaces: press CPR button or turn CPR dial on control unit and/or open CPR valve at head of mattress if installed.

4. Squeeze and hold CPR lever located at head of bed. You may also use CPR button located on footboard control to flatten deck.

5. Proceed with facility protocols for resuscitation.

Troubleshooting

Bed will not respond

— Verify all functions on footboard control are unlocked.

— Verify bed's power cord is plugged into working AC outlet and not cut, frayed or damaged.

— Inspect patient hand control for damage and ensure it is properly connected.

Function of bed doesn't operate

— Verify function in question is unlocked on footboard control.

Bed will not operate on battery power

— Verify patient hand control is properly connected.

Warning: Before working on any electrical component, unplug bed and disconnect battery. If these steps aren't performed, damage to the electrical system may occur. If equipment continues to malfunction, call 800-814-9389
