

# ALTERNATION LOW AIR LOSS

for active pressure  
redistribution

## Alternate™/Mighty Air™

Alternate and its bariatric counterpart, Mighty Air, offer active pressure redistribution with 1-in-3 alternating pressure. The surfaces' low air loss capability and high-tech fabric combine to help control patient microclimate, while immersion mode promotes proper envelopment. Both surfaces are sized to fit most Med-Surg and ICU bed frames.

Indicated for pressure injury prevention and treatment

Breathable, low-friction, anti-shear top cover fabric

Two modes: 1-in-3 alternation and immersion

Available in standard and bariatric sizes

# Easy-to-Use Interface

includes instructions for use and QR code for training/support resources

1-in-3 alternation therapy provides active pressure redistribution

Low air loss technology and breathable top cover help control patient microclimate

Available for a variety of facility-owned or Agiliti rental bed frames

## KEY SPECS

### MATTRESS

Safe Working Load . . . . .600 lb./1,000 lb.  
 Max Patient Weight . . . . . 550 lb./950 lb.  
 Width . . . . . 35", 39", or 48"  
 Length . . . . . 80" or 82"  
 Height . . . . . 8"/9"  
 Weight . . . . .19-37 lb.  
 Sizes . . . . . Standard and Bariatric

### CONTROL UNIT

Alternation Mode . . . . . 3-20 min.  
 Immersion Mode (Static) . . . . . Yes  
 Low Air Loss . . . . . Yes  
 Alarms . . . . . Power Failure/Low Pressure  
 Control Unit Type . . . . . Blower

CPR Release . . . . . Yes  
 HEPA Filter . . . . . Yes  
 Pressure Sensor Technology . . . . . Yes  
 Weight . . . . . 16 lb.

### PERFORMANCE FABRICS

Polycarbonate 4-Way Stretch . . . . . Standard Top Cover  
 Nylon Taffeta . . . . . Optional Top Cover  
 Non-Skid Polyurethane . . . . . Standard Bottom Cover

### FABRIC CHARACTERISTICS

-  Breathable
-  Low Friction
-  Advanced Chemical Resistance
