

BEST PRACTICES WHEN ENTERING YOUR HOME

FIGHTING COVID-19

1

Change out of work clothes and place in bag before entering your home. Immediately wash at high temperature.

2

Remove your shoes - leave outside, in garage, or place in bag by front door.

3

Disinfect your hands before entering your home. Once in your home, wash your hands with warm soap and water for 20 seconds.

4

Place your purse, bag, wallet, keys, etc. in a bag or box at the inside entrance of your home.

5

Disinfect your mobile phone and glasses.

6

Disinfect any frequently touched entry-way surfaces, light switches and items carried into your home.

7

Before hugging your loved ones or petting your pet, ensure you have changed out of your work clothes and washed your hands.

8

Recommend that you take a shower when you arrive home from work. At minimum, wash all exposed areas (hands, arms, neck & face) with soap and warm water.
